International Journal of
SATELLITE COMMUNICATIONS (*Int. J. Satell. Commun.*)

CONTENTS

VOLUME 6, ISSUE Nos 1–4

ISSUE No. 1 January–March

Editorial 1

The TDMA Burst-mode Link Analyser with Least-squares Algorithm: Y.-S. Liu and S.-Q. Feng .. 3

Effects of Baseband Predistortion at the Transmitter on the Performance of a DEQPSK Satellite Modem: S. W. Cheung and A. P. Clark 13

Space Radio Services and WARC-MOB-87: D. J. Withers 25

CDMA versus FDMA Channel Capacity in Mobile Satellite Communication: K. G. Johannsen 29

Propagation Theory in Adaptive Cancellation of Cross-polarization: A. Ghorbani and N. J. McEwan 41

A Comparison of the Implementation and Annual Operating Costs of IDR and TDMA in the INTELSAT System: R. J. Colby and A. K. Kwan 53

Effects of Solar Transit on K_u-band VSAT Systems: F. Mohamadi, D. L. Lyon and P. R. Murrell 65

CONFERENCE REPORT: 1987 Tirrenia International Workshop on Digital Communications, 14–16 September 1987 73

ANNOUNCEMENT 75

CALL FOR PAPERS 75

ISSUE No. 2 April–June

(Special Issue on Intersatellite Links)

Editorial 77

Introduction: R. A. Peters 79

Principles and Design of Bidirectional Optical ISL Using GaAlAs Laser at $\lambda = 0.85\ \mu$m and Direct Detection PPM: Z. Zhu 81

Solid-state Laser Cross-link Systems and Technology: D. L. Begley, R. A. Kobylinski and M. Ross 91

Identification of Requirements for Intersatellite Links: A. Puccio, E. Saggese and C. Soprano 107

In-orbit Demonstration of Optical IOL/ISL—the Silex Project: J. L. Vanhove and C. Noeldeke ... 119

An Experimental Optical Link between an Earth Remote Sensing Satellite, SPOT 4, and a European Data Relay Satellite: M. Arnaud, A. Barumchercyk and E. Sein 127

Research and Development Activities of Optical ISLs in Japan: K. Yasukawa, K. Araki, K. Kashiki and T. Aruga 141

Performance of Optical Intersatellite Links: M. Wittig and G. Oppenhäuser 153

Optical ISL Tracking Considerations in Meeting ISDN Requirements: R. A. Peters 163

Error Correction, Interleaving and Differential Pulse Position Modulation: R. E. Peile 173

Laser Diode Intersatellite Links: Communications Subsystem: A. Arcidiacono and S. De Vita 189

Optical Intersatellite Link with Direct Detection: the Laser Diode-pumped Nd Laser Option: M. Arrigoni and R. Maddè 197

Abstracted/indexed by Cambridge Scientific Abstracts, Current Contents, Engineering Index, INSPEC, Science Associates Int. Inc., Telecommunications Abstracts and Telescope Networks

Functional Specifications and Evaluation of Commercially Available Laser Diodes for Optical Space Links: M. Roux, D. Chauve and G. Keil–Simon 209

On-ground Testing of a Full-scale Homodyne CO_2 Laser Transceiver for Free-space Communications Applications: W. Reiland and A. Popescu 219

Stratospheric Balloons as a Testbed for Optical Space Communications Technology: U. Johann and W. Reiland 225

Interface between an Optical Communications System and the Host Spacecraft: J. D. Barry 231

CALLS FOR PAPERS 239

ANNOUNCEMENT 240

ISSUE No. 3 July–September

(Dual Focused Edition on Multi-carrier Demodulators and Fade Countermeasures)

Editorial 241

Multi-carrier Demodulators for On-board Processing Satellites: W. H. Yim, C. C. D. Kwan, F. P. Coakley and B. G. Evans 243

A PSK Group Modem Based on Digital Signal Processing: Algorithm, Hardware Design, Implementation and Performance: F. Takahata, M. Yasunaga, Y. Hirata, T. Ohsawa and J. Namiki 253

Alternatives for On-board Digital Multicarrier Demodulation: E. Del Re and R. Fantacci 267

A Modular Multistage Approach to Digital FDM Demultiplexing for Mobile SCPC Satellite Communications: H. Göckler 283

On-board Digital Signal Processing Technologies for Present and Future SCPC Systems: S. Kato, K. Ohtani, T. Kohri, M. Morikura, M. Umehira and S. Kubota 289

Fade Countermeasures at K_a Band for Olympus: M. J. Willis and B. G. Evans 301

Frequency Diversity and its Applications: F. Carassa, G. Tartara and E. Matricciani 313

Up-link Power Control of Satellite Earth-stations as a Fade Countermeasure of 20/30 GHz Communications Systems: J. Hörle 323

A Technique for Estimating the Throughput of Adaptive TDMA Fade Countermeasure Systems: S. K. Barton and S. E. Dinwiddy 331

Computer-aided Evaluation of Propagation Impairment Restoration Techniques: M. Harverson and T. R. Brunt 343

BOOK REVIEW 361

ANNOUNCEMENT 362

ISSUE NO. 4 October–December

(Special Issue on Intermediate Data Rate)

Editorial 363

Guest Editorial 365

Frontispiece — The INTELSAT IDR System. Another Milestone in Moving the World to an All Digital Network: D. Burch 367

The Development of Intermediate Data Rate (IDR) Digital Transmission Performance Characteristics: M. J. Robusto 369

Development of FEC and ESC Performance Characteristics for IDR Carriers Greater than 10 Mb/s: F. Loureiro and K. Koga 391

The Role of Intermediate Data Rate (IDR) Carriers in the INTELSAT System and their Impact upon Operational Planning: P. W. Roach 403

INTELSAT Planning and Modelling Software in Support of IDR: R. W. Duesing and M. J. Kelinsky 407

Implementation of INTELSAT IDR Operation: G. A. Brown and C. A. M. Smith 419

Transmission of Intermediate Data Rates: The Mercury Experience: M. W. Harman 427

Intermediate Data Rate (IDR) Implementation Examples: M. J. Robusto 439

Forward Error Correction Applied to INTELSAT IDR Carriers: S. A. Morley 445

A Modem for IDR/IBS Applications: A. M. Werth 455

Digital Modulation/Demodulation Equipment for the INTELSAT Intermediate Data Rate (IDR) Service: P. F. Robinson 467

IDR Digital Modem Terminal Equipment: S. Otani and Y. Goto 475

A Supplier's Response to IDR: A. Entenman and H. Hirschman 487

A Framing Unit for All Services: N. Mills 499
